Full-Stack Developer (MEAN & MERN Stack)

Summary

Results-driven Full-Stack Developer with hands-on experience building robust applications using Angular, Node.js, NestJS, and Express.js. Proficient in database design, REST APIs, and modern state management across Prisma ORM, PostgreSQL, MongoDB, and MySQL architectures. Adept at technical problem solving and continuous learning within agile environments to engineer efficient, scalable software solutions.

Technical Skills

Frontend: Angular, React, JavaScript, TypeScript, HTML, CSS, Bootstrap
Backend: Node.js, Express.js, NestJS, Prisma ORM
Databases: SQL, PostgreSQL, MySQL, MongoDB, Mongoose
Tools: Git, GitHub, REST APIs, Postman

Internships

Information Technology Institute (ITI) Jan 04, 2026 – Present
ME-ARN Stack Development Track Qena, Egypt

- Participating in an intensive professional training scholarship specializing in full-stack web architectures.
- Building scalable enterprise-level applications leveraging Angular, React, Node.js, and modern backend frameworks like NestJS.

Information Technology Institute (ITI) Mar 2025 – June 2025
Software Engineering Fundamentals Track Qena, Egypt

- Completed comprehensive technical training focused on foundational computer science principles, algorithms, and data structures.

National Telecommunication Institute (NTI) June 2025 – Aug 2025
MEAN Stack Development Training Remote

- Engineered responsive full-stack applications using Angular, Node.js, Express.js, and MongoDB database environments.

Projects

Startup Management Platform
ITI Graduation Project — Full-Stack Developer

- Developed a full-stack web application designed for managing startup registration workflows and administrative operations.
- Designed and implemented the structured relational database schema utilizing PostgreSQL.
- Built scalable, secure backend REST APIs leveraging NestJS, Prisma ORM, and JWT authentication.
- Developed responsive, modular user interfaces using Angular standalone components.
- Connected frontend layouts with backend API endpoints, collaborating across all core architectural layers using Git.

E-commerce Platform
React, Node.js, MongoDB, Material UI

- Developed a full-featured e-commerce frontend architecture supporting product catalogs, persistent cart state, and custom checkout flows.
- Integrated optimized RESTful APIs for real-time asynchronous data fetching and secure user authentication via JWT.

E-commerce Coffee Shop
Angular, Node.js, Express.js, MongoDB

- Engineered a dynamic full-stack e-commerce application featuring an intuitive user interface and structured product management workflows.
- Managed secure user authentication routines and maintained client state via a persistent shopping cart pipeline integrated with MongoDB.

Bear and Burger Challenge (Game)
JavaScript (ES6+), HTML5 Canvas, CSS3

- Designed and executed an interactive, browser-based game implementing vanilla object-oriented game logic and custom canvas animations.

Education

South Valley University 2020 – 2024
Bachelor's Degree in Science (Physics) Qena, Egypt

- Cumulative Grade: Very Good

Soft Skills & Methodologies

Professional: Communication, Problem Solving, Adaptability, Time Management, Teamwork.
Methodologies: Agile (Scrum), Daily Stand-ups, Sprint Planning.

Languages
